DETAILED ACTION

Claims 12-16 and 20-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/2/06.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerenraich et al 6,607,103.

Gerenraich et al show an electronic dispenser comprising a housing 24, pump 44, mounting assembly 12, electronic actuating mechanism 94, 100 and motor 108.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerenraich et al '103 in view of Lewis et al 6,33,45.

Gerenraich et al lack the housing supported by the back unit 12 with a mounting bracket and recess. Lewis et al shows a housing having a recess 50 engaging a

mounting bracket 60 to secure the housing. It would have been obvious to one of ordinary skill in the art to have modified the Gerenraich back plate with a mounting bracket and the housing with a recess as taught by Lewis et al to secure the housing.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shu et al, Hoffman et al and Sayers et al were cited to show further examples of electronic dispensers.
